# Privacy Policy

Online safety is a common concern with all parents (and also with our family). We have done our best to make sure that no data is collected nor services used that would be of concern when this app is used by children. However, to make the app free, we are displaying ads periodically, but have taken additional precautions to request ads that are safe for children and COPPA compliant.

Read the full privacy policy disclosure below for more details.

Tracking and Ads -- YES / Limited

We only request ads that are safe for children and are COPPA compliant.

Social Integration -- NO

No such services are enabled in this app.

Location Services -- YES / Limited

Only uses coarse location to be able to serve more relevant ads.

Internet Services -- NO

No external internet services are made available.

Purchases or Billing -- NO

No such services are available in this app.

Collection and Use -- NO

No data is collected by this app but the services it uses do track usage analytics.

Sharing Your Information -- NO

No data is collected by this app but the services it uses may share ad tracking analytics.

Security -- NO

No data is collected by this app so there are no security features.

Third Party Services

This app was built using **Corona SDK** which may collect some very basic analytics. Ads are displayed using **Appodeal** and we have configured the integration to only request ads that are both **child friendly and COPPA compliant**. Some data is typically collected by these services (e.g., basic analytics, coarse location, advertising identifier), but no personally identifiable information should be collected. Ultimately, we are not in complete control of the ads displayed nor the data they may or may not track, but again,

we have specifically selected an advertising mediator that allows us to request content that is both **child friendly and COPPA compliant**.

Notification of Changes

In the event that we need to update or amend this privacy policy the update will be published on our website (shown below), included in this help file, and included in an app version update.
